

Child and Booster Seat Guide | Australia

01 April 2019 – 31 March 2020

Child restraints for all vehicles

The type of restraint required for your child depends on their age as follows:

- Children aged **under six months** (up to 9kg) must travel in an approved, properly fastened and adjusted, rear facing child seat restraint. An anchor point is required for this seat. Children in this category cannot be seated in the front passenger seat of our vehicles
- Children aged **between six months and under four years** (8-18kg) must travel in an approved, properly fastened and adjusted, rear facing child seat restraint **OR** a forward facing child restraint with an in-built harness. An anchor point is required for these seats. Children in this category cannot be seated in the front passenger of our vehicles
- Children aged **between four years and under seven years** (14-26kg) must travel in an approved, properly fastened and adjusted, forward facing child seat restraint with an in-built harness (anchor point required) **OR** an approved booster seat which is properly positioned and fastened with a standard diagonal sash seatbelt. Whilst it is legal (under certain circumstances) for a child in this category to sit in the front seat, **thl** does not recommend any child under seven years (under 26kg) travels in the front passenger seat

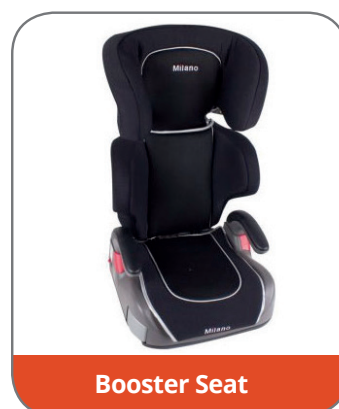

Child Seat

Hiring a child or booster seat or bringing your own

- Child seats and Booster seats are available for hire from all **thl** branches for AU\$36 per hire. Child/booster seats are included in the Inclusive Pack for each brand. We strongly recommend any child restraints are pre booked
- All child restraints must comply with current Australian Standards and must be labelled with an Australian Standards sticker for the standard AS/NZS 1754
- Child and Booster seats brought from overseas do not comply with the Australian and New Zealand standard and it is illegal to use them in Australia
- It is the responsibility of customers to fit the seats in the vehicle

Where your child can sit*

- Front passenger seats AND *rear facing* passenger seats in all vehicles are not fitted with anchor points and cannot accommodate children under four years in any case
- If all appropriate rear seats are being used by children under seven years, children aged between four and six years (inclusive) may travel in the front passenger seat, provided they use an approved booster seat, although **thl** does not recommend any child under seven years travels in the front passenger seat
- Equally, children in approved booster seats are permitted to travel in the vehicle's *rear facing* passenger seats if the forward facing seats in the rear are occupied by children under seven years old in suitable child restraints or booster seats

Booster Seat

PLEASE NOTE: This is designed as a guide only.
For further information please discuss with your Reservations Consultant.

For further details on
where your child can
sit in our campervans
please see overleaf.
